

Mississippi Bankers Association presents
2009 Network Security (2 Part Series)

<p>WEBINAR SEMINAR</p> 	Date:	August 5, 2009 Part I August 20, 2009 Part II
	Time:	1:30 – 3:30 p.m. Central Time
	CPE Available:	2.5 hours CRCM/CFSSP per session
	Seminar Code:	SW2-1090
Program Highlights:	<p>Part 1 - August 5, 1:30-3:30 p.m. CT <u>Phishing for Identities: The Growing Threat of Crimeware</u> New threats, old threats and reinvented malicious attacks continue to emerge:</p> <ul style="list-style-type: none"> • Sites infecting PCs with password-stealing crimeware reached an all time high of 31,173 in December 2008 (text messaging and telephone phishing attacks not included) • Beginning in May, Symantec has observed a new wave of phishing attacks on Facebook users. • A link redirects to a site masquerading as the Twitter front page. <p>While implementing controls and detection measures is important, employee and customer awareness is paramount. Highlights include:</p> <ul style="list-style-type: none"> • Trends and statistics • Overview of phishing, malware, crimeware • What can we do about it <p>Audience: Senior management, audit, compliance, operations, IT, and anyone else interested in today's threats and security.</p> <p>Part 2 - August 20, 1:30-3:30 p.m. CT <u>The Network Security Headache: Is There an Easy Remedy?</u> Security breaches and identity theft dominate the headlines. Along with protecting your customer's information, you also need to protect the institution's intellectual and proprietary information. This presentation covers the threats facing institutions today and methods for securing your network and protecting valuable information assets including:</p> <ul style="list-style-type: none"> • What are the real threats and challenges • Policies and controls • Regulatory requirements <p>Audience: Network administrators, IT auditors, senior management, operations, risk managers, compliance officers.</p> <p>Part 3 - September 2, 1:30-3:30 p.m. CT <u>Social Engineering: The Easiest Way to Get Access to Your Systems or Information</u> Social engineering is the act of manipulating people into performing actions or divulging confidential information. If employees succumb to social engineering it doesn't matter how many controls are in place. Understanding these types of attacks, educating employees and having a mitigation plan are essential to thwarting attacks and ensuring compliance with GLBA and ID Theft Red Flag Rules. Highlights include: Types of social engineering and the techniques used</p> <ul style="list-style-type: none"> • Real life examples • What you can do to help prevent social engineering at your bank <p>Audience: Senior management, auditors, operations, HR, training, security officers or anyone interested in protecting the institution.</p>	
Seminar Speakers:	<p>Susan Orr, CISA, CISM, CRP, is an industry expert with vast regulatory, risk management, and security knowledge. During her 14-years as bank examiner, Susan held numerous lead positions including Regional IT Examination Specialist, Special Assistant to the Regional Director, and Special Assistant to the Vice Chairman of the FDIC. She currently consults for security providers and performs IT security/regulatory reviews for financial institutions.</p>	
What is a Webinar Seminar?	<p>This program includes 90 minutes of instruction and 30 minutes live Q&A per session. Each registrant provides one connection to the live webinar and 30 days access to the online seminar. You may have unlimited participants on your connection by speaker phone. The On-Demand Webinar is a live webinar that has been recorded and then streamed to your computer to watch at your convenience. The program can be viewed anytime 24/7.</p>	
What are the costs?	<p>Tuition is \$250 per 'site license' per session, and listeners on your connection are unlimited.</p>
